AARON GABRIEL ALONZO

SENIOR WEB DEVELOPER & DESIGNER | WORDPRESS · UI/UX · INTEGRATIONS

Quezon City, Philippines | +63 975 493 2610 | aarongabrielalonzo@gmail.com

PROFESSIONAL SUMMARY

Senior web developer and designer with **6 years** turning design concepts into fast, responsive, conversion focused WordPress websites. Comfortable owning a build end to end: Figma handover or original design work, custom theme and plugin development in PHP, launch, then ongoing performance and maintenance. Currently design and develop across a portfolio of 30 branded websites, with an emphasis on reusable component systems that keep visual identity consistent at scale. A background in enterprise process automation (Blue Prism) brings a systems mindset to repeatable build, QA, and deployment work.

WORK EXPERIENCE

Big Market Solutions | Senior Web Developer & Designer

MAY 2024 – PRESENT

Remote, US

- Design and develop across a portfolio of **30 branded WordPress websites**, taking each from Figma concept to launch with pixel accurate UI, **90+ Lighthouse scores**, and full cross browser responsiveness.
- Develop **custom PHP plugins and bespoke page builder widgets** that extend WordPress past stock functionality, packaged as reusable components deployed across the portfolio.
- Design and standardize recurring page types into **reusable templates and component libraries**, keeping UX and visual identity consistent across all 30 brands while cutting build time on new campaign pages.
- Own the lead capture pipeline, integrating website forms with enterprise CRM through a message queue so **100% of submissions are captured and archived**, preventing lead loss from server errors and saving **10+ hours of manual entry weekly**.
- Integrate WordPress with **Iterable** for marketing automation, populating custom form widgets with live depot and location data pulled from the Iterable API behind a transient cache layer, and standing up new brand spaces for campaign delivery.
- Improve page speed across the portfolio through caching, asset optimization, and CDN configuration, holding Core Web Vitals in the green on content heavy templates.
- Handle site health and analytics implementation portfolio wide, including GA4 and Google Tag Manager tracking and architecture fixes that cut crawl errors by **40%** and lifted organic traffic **25%** on average.

Performance Physical Therapy & Fitness | In House Web Developer & Designer

JUL 2020 – APR 2024

Remote, US · 3 yrs 9 mos

- Architected and launched **3 core company websites from the ground up** using custom WordPress and front end development, tailored to separate business lines.
- Built monthly landing page campaigns that optimized the marketing funnel and triggered a **50% increase in lead conversions** through technical precision and UI/UX refinement.
- Maintained and optimized all company sites for performance, accessibility, and search visibility, sustaining **99.9% uptime**.
- Partnered cross functionally with marketing and content specialists, translating complex requirements into intuitive user journeys.

DXC Technology | Technology Consultant (Blue Prism RPA Developer)

- Led development of a new Blue Prism automation for **P&G**, streamlining Return Sales Order creation and Delivery Number generation and **reducing manual effort by 30%**.
- Enhanced existing pallet label printing automation for process accuracy, and maintained multiple Blue Prism processes under the **Nestlé** account to keep operations stable 24/7.
